

Find out more about sand dunes
and share your artwork with us!
@dynamicdunes

Did you know?

Grey seals have dense fur and a thick layer of blubber to keep them warm in chilly waters. They are active carnivores and can weigh up to 400kg, over 6 times the average human! They love to sunbathe on rocks or sandy beaches, and from November can be seen with their fluffy white pups at places like Donna Nook.

Lincolnshire
Wildlife Trust

Dynamic Dunescapes is a partnership project restoring sand dunes across England and Wales for the benefit of wildlife, people and communities. Project partners are Natural England, Plantlife, National Trust, Natural Resources Wales and the Wildlife Trusts, and the project is supported by the National Lottery Heritage Fund and the EU LIFE Programme.
