

Homemade Plastic Free Decorations

Paper Christmas Tree

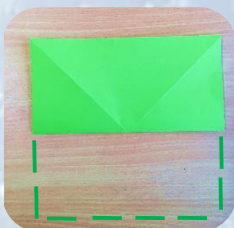

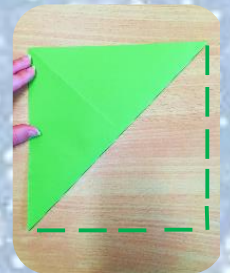

Step 1

Take your A4 piece of paper and fold the corner over. Cut the end off to make it into a square.

Step 2

Fold your paper diagonally again, unfold. You should now have 2 diagonal folds on your paper.

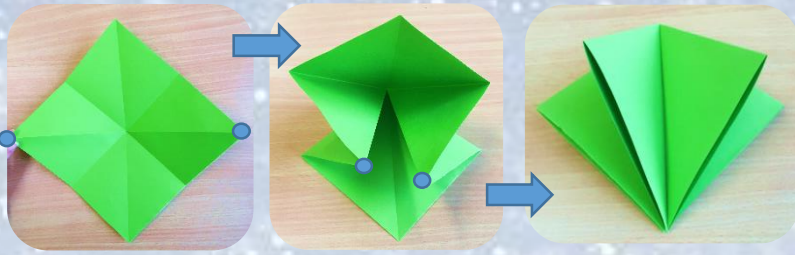

Step 3

Fold your square paper in half, unfold. Then fold it in half the other direction, unfold. Altogether you should have 4 folds, 2 diagonal, 1 horizontal and 1 vertical.

Step 4
Take the two corners indicated (●) and fold towards the center and down towards to the bottom corner. You should have 4 flaps now.

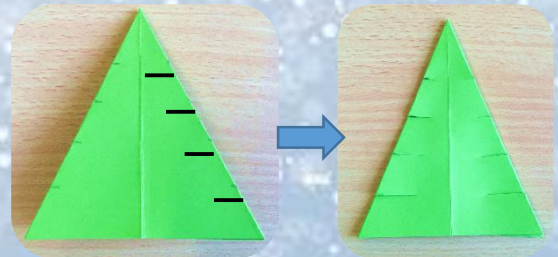

Step 5
Take the flaps and start to flatten each one down. Use the pencil to puff out the top point and then finish flattening.

Step 6
Once you have flattened all the flaps cut the bottom bit off.

Step 7
On each side on the facing triangle place 4 evenly spaced marks. Cut through all layers of the paper roughly half way to the middle to create your branches.

Step 8
Next fold the new cut flaps over to create your branch. Do this on all sides.

Step 9
Separate out the different sides to get your Christmas Tree shape.
