

Homemade Plastic Free Decorations

Giant Paper Snowflake

Step 1

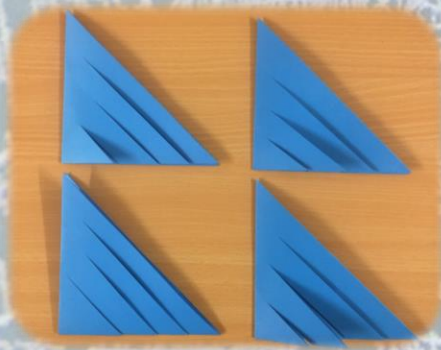

You will need 6 A4 pieces of paper. Fold the corner over and cut the end off to make it into a square.

Step 2

Keeping the paper folded in a triangle, fold it again to make a smaller triangle.

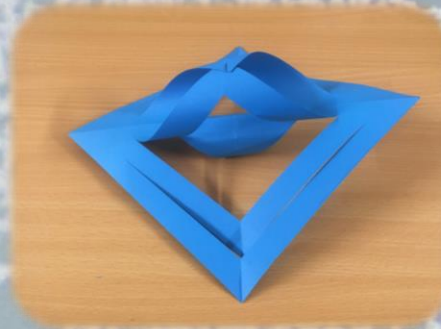

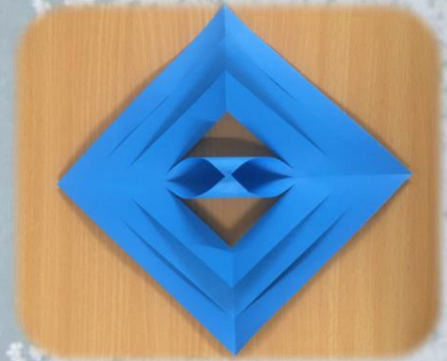

Step 3

Cut from the short open side to the short folded side, leaving a gap at the end. Do this 3 times making sure your cuts are equally spaced.

Step 4

Unfold your triangle. Attach the two inner flaps together.

Step 5

Flip your work and attach the next two inner flaps together. Repeat this until you have no flaps left.

Step 6

Attach 3 of your snowflake arms together at the bottom. Repeat this with the other 3 and then attach them all together, so they are joined in the middle of your snowflake.

Step 7

To finish off, attach the snowflake arm sides to each other.
